

The FAA Safety Team presents:

Aviation Human Factors: Protecting Us from Ourselves Session at HAI HELI-EXPO 2016

It has been said that there are no new accidents. So why do we continue to keep making the same mistakes? This session will use case studies and video to examine the answers to this question. In the process, participants will be introduced to human factors and error management theory.

After this session, attendees will be able to: Develop an understanding of the error chain and how it can be broken. Understand the top causal factors in accidents today. Recognize the need for error management training. Recognize the three elements of disorientation and how they occur in multitasking. Understand the role that standard operating procedures play in reducing exposure to risk during flight operations. This course is offered at HAI HELI-EXPO 2016, the world's largest helicopter trade show. For more information on HELI-EXPO and education courses, click here.

Directions: South Wing C

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
